Cancer Letters, 55 (1990) 255—258
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 55

Adenocarcinoma, bronchoalveolar carcinoma, pulmonary carcinogenesis, alveolar type II cells, bronchial autografts, dog lung, 177
Adhesion, metastases, folate, membrane, melanoma, 95
O^6-Alkylguanine-DNA alkyltransferase, chloroethylnitrosoureas, brain tumors, drug resistance, DNA repair, 153
Alveolar type II cells, bronchoalveolar carcinoma, adenocarcinoma, pulmonary carcinogenesis, bronchial autografts, dog lung, 177
Anthracyline antibiotics, Ca^{2+} antagonists, tumor promotion, mouse skin, 135
Anti-tumor activity, fucoxanthin, carotenoid, 75
Antigenic peptides, scanning tunneling microscopy, mucin, conformation, 13
Antineoplastic drug, chlorambucil, carcinogenesis, 115
Antioxidants, selenium, β-carotene, ferulic acid, eugenol, modification, 53
Antitumor activity, water-miscible paltinum(II) complexes, B16-F10 melanoma cells, micelle-forming platinum(II) complexes, pulmonary metastases, 143
Aristolochic acid, nitro naphtoic acids, *peri* substitution, mutagenicity, molecular orbital calculations, 7
Ascites hepatoma, rat, highly repetitive DNA, sequence, 201

B16-F10 melanoma cells, water-miscible paltinum(II) complexes, micelle-forming platinum(II) complexes, pulmonary metastases, antitumor activity, 143
BEC, solasodine glycosides, cytotoxic, endogenous lectins, human cancer cells, in vitro, 209
BEC, solasodine glycosides, cytotoxic, sarcoma 180, in vivo, 221
Benzo[*a*]pyrene, vitamin A deficiency, cigarette smoke, lung tumors, 83
Benz[a]pyrene, transgenerational effect, lung adenoma, transplacental treatment, 227
Berberine, teratocarcinoma, differentiation, Ki-*ras* protooncogene, 103
Beta-blockers, DNA damage, liver tumors, mutagens, sex-dependent genotoxicity, 61
Bile acids, pepsinogen-altered pyloric glands, rats, immunohistochemistry, 129
Brain tumors, O^6-alkylguanine-DNA alkyltransferase, chloroethylnitrosoureas, drug resistance, DNA repair, 153
Breast cancer, colorectal neoplasia, rectal epithelial proliferation, tritiated thymidine labelling, 189
Breast cyst fluid, oestrogen 17-oxidoreductase, mammary carcinogenesis, 165
Bronchial autografts, bronchoalveolar carcinoma, adenocarcinoma, pulmonary carcinogenesis, alveolar type II cells, dog lung, 177
Bronchoalveolar carcinoma, adenocarcinoma, pulmonary carcinogenesis, alveolar type II cells, bronchial autografts, dog lung, 177
Butylated hydroxyanisole, butylated hydroxytoluene, catechol, glutathione *S*-transferase placental form, rat hepatocarcinogenesis, inhibition, 25
Butylated hydroxytoluene, butylated hydroxyanisole, catechol, glutathione *S*-transferase placental form, rat hepatocarcinogenesis, inhibition, 25

Ca^{2+} antagonists, anthracyline antibiotics, tumor promotion, mouse skin, 135
Cancer breakpoints, variant Ph^1 translocation, fragile sites, oncogenes, 249
Carboplatin, thymidine, toxicity, in vivo, 39
Carcinogenesis, chlorambucil, antineoplastic drug, 115
β-Carotene, antioxidants, selenium, ferulic acid, eugenol, modification, 53
Carotenoid, fucoxanthin, anti-tumor activity, 75
Catechol, butylated hydroxyanisole, butylated hydroxytoluene, glutathione *S*-transferase placental form, rat hepatocarcinogenesis, inhibition, 25
Cell fusion, tumor heterogeneity, metastasis, tumorigenicity, 109
Chemoprevention, 1α-hydroxyvitamin D_3, colonic neoplasms, medium chain triglyceride, 149
Chemoprevention, neuroblastoma, retinoid, retinoic acid, 1
Chlorambucil, antineoplastic drug, carcinogenesis, 115
Chloroethylnitrosoureas, O^6-alkylguanine-DNA alkyltransferase, brain tumors, drug resistance, DNA repair, 153
Cigarette smoke, vitamin A deficiency, lung tumors, benzo[*a*]pyrene, 83

Cigarette smoking, pancreas cancer, histopathology, 121
Colonic neoplasms, 1α-hydroxyvitamin D_3, chemoprevention, medium chain triglyceride, 149
Colorectal neoplasia, breast cancer, rectal epithelial proliferation, tritiated thymidine labelling, 189
Conformation, scanning tunneling microscopy, mucin, antigenic peptides, 13
Cytotoxic, solasodine glycosides, BEC, endogenous lectins, human cancer cells, in vitro, 209
Cytotoxic, BEC, solasodine glycosdies, sarcoma 180, in vivo, 221
Cytotoxicity, DT diphorase, 4-nitroquinoline-1-oxide, menadione, dicoumarol, 195

Dicoumarol, DT diphorase, cytotoxicity, 4-nitroquinoline-1-oxide, menadione, 195
Diethylnitrosamine, hepatocarcinogenesis, gamma-glutamyltranspeptidase, estrogen, preneoplastic lesions, 45
Differentiation, teratocarcinoma, berberine, Ki-*ras* protooncogene, 103
2,5-Dihydroxybiphenyl, skin carcinogenesis, 2-phenyl-1,4-benzoquinone, mouse, 233
Direct-acting carcinogen, *N*-methyl-*N'*-nitrosourea, neoplastic transformation, mouse mammary epithelial cells, organ culture in vitro, 31
DNA damage, beta-blockers, liver tumors, mutagens, sex-dependent genotoxicity, 61
DNA repair, O^6-alkylguanine-DNA alkyltransferase, chloroethylnitrosoureas, brain tumors, drug resistance, 153
Dog lung, bronchoalveolar carcinoma, adenocarcinoma, pulmonary carcinogenesis, alveolar type II cells, bronchial autografts, 177
Drug resistance, O^6-alkylguanine-DNA alkyltransferase, chloroethylnitrosoureas, brain tumors, DNA repair, 153
DT diphorase, cytotoxicity, 4-nitroquinoline-1-oxide, menadione, dicoumarol, 195

Endogenous lectins, solasodine glycosides, BEC, cytotoxic, human cancer cells, in vitro, 209
Epidermal growth factor, insulin-like growth factor I, transforming growth factor, mammary cancer, messenger RNA, growth factor receptor, 89
Estrogen, hepatocarcinogenesis, diethylnitrosamine, gamma-glutamyltranspeptidase, preneoplastic lesions, 45
Eugenol, antioxidants, selenium, β-carotene, ferulic acid, modification, 53

Ferulic acid, antioxidants, selenium, β-carotene, eugenol, modification, 53
Folate, metastases, membrane, adhesion, melanoma, 95
Fragile sites, variant Ph^1 translocation, cancer breakpoints, oncogenes, 249
Fucoxanthin, carotenoid, anti-tumor activity, 75

Gall bladder, tamoxifen, rifampicin, pancreas, 159
Gamma-glutamyltranspeptidase, hepatocarcinogenesis, diethylnitrosamine, estrogen, preneoplastic lesions, 45
Glutathione *S*-transferase placental form, butylated hydroxyanisole, butylated hydroxytoluene, catechol, rat hepatocarcinogenesis, inhibition, 25
Growth factor receptor, insulin-like growth factor I, transforming growth factor, epidermal growth factor, mammary cancer, messenger RNA, 89

Heme pathway, porphyris, mammary tumor, *N*-nitroso-*N*-methylurea, hexachlorobenzene, porphyrins, 67
Hepatocarcinogenesis, diethylnitrosamine, gamma-glutamyltranspeptidase, estrogen, preneoplastic lesions, 45
Hexachlorobenzene, porphyris, mammary tumor, *N*-nitroso-*N*-methylurea, porphyrins, heme pathway, 67
Highly repetitive DNA, ascites hepatoma, rat, sequence, 201
Histopathology, pancreas cancer, cigarette smoking, 121
Human cancer cells, solasodine glycosides, BEC, cytotoxic, endogenous lectins, in vitro, 209
Human tumour cell lines, radiosensitivity, SV40-transfection, 171
1α-Hydroxyvitamin D_3, colonic neoplasms, chemoprevention, medium chain triglyceride, 149

Immunohistochemistry, bile acids, pepsinogen-altered pyloric glands, rats, 129
Immunotargeting, oxygen-free-radical, meth A tumor cell, 183
Inhibition, butylated hydroxyanisole, butylated hydroxytoluene, catechol, glutathione *S*-transferase placental form, rat hepatocarcinogenesis, 25
Insulin-like growth factor I, transforming growth factor, epidermal growth factor, mammary cancer, messenger RNA, growth factor receptor, 89
In vitro, solasodine glycosides, BEC, cytotoxic, endogenous lectiins, human cancer cells, 209
In vivo, thymidine, carboplatin, toxicity, 39
In vivo, solasodine glycosides, BEC, cytotoxic, sarcoma 180, 221

Ki-*ras* protooncogene, teratocarcinoma, differentiation, berberine, 103

Laboratory chow, pancreatic carcinogenesis, rat, saturated fat, linoleic acid, 239
Linoleic acid, pancreatic carcinogenesis, rat, saturated fat, laboratory chow, 239
Liver tumors, beta-blockers, DNA damage, mutagens, sex-dependent genotoxicity, 61
Lung adenoma, transgenerational effect, benz[a]pyrene, transplacental treatment, 227
Lung tumors, vitamin A deficiency, cigarette smoke, benzo[*a*]pyrene, 83

Mammary cancer, insulin-like growth factor I, transforming growth factor, epidermal growth factor, messenger RNA, growth factor receptor, 89
Mammary carcinogenesis, breast cyst fluid, oestrogen 17-oxidoreductase, 165
Mammary tumor, porphyris, *N*-nitroso-*N*-methylurea, hexachlorobenzene, porphyrins, heme pathway, 67
Medium chain triglyceride, 1α-hydroxyvitamin D_3, colonic neoplasms, chemoprevention, 149
Melanoma, metastases, folate, membrane, adhesion, 95
Membrane, metastases, folate, adhesion, melanoma, 95
Menadione, DT diphorase, cytotoxicity, 4-nitroquinoline-1-oxide, dicoumarol, 195
Messenger RNA, insulin-like growth factor I, transforming growth factor, epidermal growth factor, mammary cancer, growth factor receptor, 89
Metastases, folate, membrane, adhesion, melanoma, 95
Metastasis, cell fusion, tumor heterogeneity, tumorigenicity, 109
Meth A tumor cell, immunotargeting, oxygen-free-radical, 183
Micelle-forming platinum(II) complexes, water-miscible paltinum(II) complexes, B16-F10 melanoma cells, pulmonary metastases, antitumor activity, 143
Modification, antioxidants, selenium, β-carotene, ferulic acid, eugenol, 53
Molecular orbital calculations, aristolochic acid, nitro naphtoic acids, *peri* substitution, mutagenicity, 7
Mouse, skin carcinogenesis, 2-phenyl-1,4-benzoquinone, 2,5-dihydroxybiphenyl, 233
Mouse mammary epithelial cells, direct-acting carcinogen, *N*-methyl-*N'*-nitrosourea, neoplastic transformation, organ culture in vitro, 31
Mouse skin, anthracyline antibiotics, Ca^{2+} antagonists, tumor promotion, 135
Mucin, scanning tunneling microscopy, conformation, antigenic peptides, 13
Multidrug-resistance, reversal, nucleoside incorporation assay, 17
Mutagenicity, aristolochic acid, nitro naphtoic acids, *peri* substitution, molecular orbital calculations, 7
Mutagens, beta-blockers, DNA damage, liver tumors, sex-dependent genotoxicity, 61

N-Methyl-*N'*-nitrosourea, direct-acting carcinogen, neoplastic transformation, mouse mammary epithelial cells, organ culture in vitro, 31
N-Nitroso-*N*-methylurea, porphyris, mammary tumor, hexachlorobenzene, porphyrins, heme pathway, 67
Neoplastic transformation, direct-acting carcinogen, *N*-methyl-*N'*-nitrosourea, mouse mammary epithelial cells, organ culture in vitro, 31
Neuroblastoma, retinoid, chemoprevention, retinoic acid, 1
4-Nitroquinoline-1-oxide, DT diphorase, cytotoxicity, menadione, dicoumarol, 195
Nitro naphtoic acids, aristolochic acid, *peri* substitution, mutagenicity, molecular orbital calculations, 7
Nucleoside incorporation assay, multidrug-resistance, reversal, 17

Oestrogen 17-oxidoreductase, breast cyst fluid, mammary carcinogenesis, 165
Oncogenes, variant Ph^1 translocation, cancer breakpoints, fragile sites, 249
Organ culture in vitro, direct-acting carcinogen, *N*-methyl-*N'*-nitrosourea, neoplastic transformation, mouse mammary epithelial cells, 31
Oxygen-free-radical, immunotargeting, meth A tumor cell, 183

Pancreas, tamoxifen, rifampicin, gall bladder, 159
Pancreas cancer, cigarette smoking, histopathology, 121
Pancreatic carcinogenesis, rat, saturated fat, laboratory chow, linoleic acid, 239
Pepsinogen-altered pyloric glands, bile acids, rats, immunohistochemistry, 129
Peri substitution, aristolochic acid, nitro naphtoic acids, mutagenicity, molecular orbital calculations, 7
2-Phenyl-1,4-benzoquinone, skin carcinogenesis, 2,5-dihydroxybiphenyl, mouse, 233
Porphyrins, porphyris, mammary tumor, *N*-nitroso-*N*-methylurea, hexachlorobenzene, heme pathway, 67
Porphyris, mammary tumor, *N*-nitroso-*N*-methylurea, hexachlorobenzene, porphyrins, heme pathway, 67
Preneoplastic lesions, hepatocarcinogenesis, diethylnitrosamine, gamma-glutamyltranspeptidase, estrogen, 45
Pulmonary carcinogenesis, bronchoalveolar carcinoma, adenocarcinoma, alveolar type II cells, bronchial autografts, dog lung, 177

Pulmonary metastases, water-miscible paltinum(II) complexes, B16-F10 melanoma cells, micelle-forming platinum(II) complexes, antitumor activity, 143

Radiosensitivity, SV40-transfection, human tumour cell lines, 171
Rat, ascites hepatoma, highly repetitive DNA, sequence, 201
Rat, pancreatic carcinogenesis, saturated fat, laboratory chow, linoleic acid, 239
Rats, bile acids, pepsinogen-altered pyloric glands, immunohistochemistry, 129
Rat hepatocarcinogenesis, butylated hydroxyanisole, butylated hydroxytoluene, catechol, glutathione *S*-transferase placental form, inhibition, 25
Rectal epithelial proliferation, breast cancer, colorectal neoplasia, tritiated thymidine labelling, 189
Retinoic acid, neuroblastoma, retinoid, chemoprevention, 1
Retinoid, neuroblastoma, chemoprevention, retinoic acid, 1
Reversal, multidrug-resistance, nucleoside incorporation assay, 17
Rifampicin, tamoxifen, gall bladder, pancreas, 159

Sarcoma 180, soladosine glyclosides, BEC, cytotoxic, in vivo, 221
Saturated fat, pancreatic carcinogenesis, rat, laboratory chow, linoleic acid, 239
Scanning tunneling microscopy, mucin, conformation, antigenic peptides, 13
Selenium, antioxidants, β-carotene, ferulic acid, eugenol, modification, 53
Sequence, ascites hepatoma, rat, highly repetitive DNA, 201
Sex-dependent genotoxicity, beta-blockers, DNA damage, liver tumors, mutagens, 61
Skin carcinogenesis, 2-phenyl-1,4-benzoquinone, 2,5-dihydroxybiphenyl, mouse, 233
Solasodine glycosides, BEC, cytotoxic, endogenous lectins, human cancer cells, in vitro, 209
Solasodine glycosides, BEC, cytotoxic, sarcoma 180, in vivo, 221
SV40-transfection, radiosensitivity, human tumour cell lines, 171

Tamoxifen, rifampicin, gall bladder, pancreas, 159
Teratocarcinoma, differentiation, berberine, Ki-*ras* proto-oncogene, 103
Thymidine, carboplatin, toxicity, in vivo, 39
Toxicity, thymidine, carboplatin, in vivo, 39
Transforming growth factor, insulin-like growth factor I, epidermal growth factor, mammary cancer, messenger RNA, growth factor receptor, 89
Transgenerational effect, lung adenoma, benz[*a*]pyrene, transplacental treatment, 227
Transplacental treatment, transgenerational effect, lung adenoma, benz[*a*]pyrene, 227
Tritiated thymidine labelling, breast cancer, colorectal neoplasia, rectal epithelial proliferation, 189
Tumorigenicity, cell fusion, tumor heterogeneity, metastasis, 109
Tumor heterogeneity, cell fusion, metastasis, tumorigenicity, 109
Tumor promotion, anthracyline antibiotics, Ca^{2+} antagonists, mouse skin, 135

Variant Ph^1 translocation, cancer breakpoints, fragile sites, oncogenes, 249
Vitamin A deficiency, cigarette smoke, lung tumors, benzo[*a*]pyrene, 83

Water-miscible paltinum(II) complexes, B16-F10 melanoma cells, micelle-forming platinum(II) complexes, pulmonary metastases, antitumor activity, 143
